

Adeyi Segun Akinola

Frontend Developer · React · Next.js · TypeScript · AI Integration

+234 912 140 2889 | Akintolaadeyi@gmail.com | linkedin.com/in/akinola-adeyi | github.com/akintolaadeyi-gif |

SUMMARY

Frontend Developer with 3+ years building production-ready React and Next.js applications. Shipped full-stack products end-to-end from Figma to deployment including a live AI-powered streaming platform, a real-time sports dashboard, and NGO and SaaS websites. Proficient in TypeScript, Tailwind CSS, Framer Motion, and the Anthropic Claude AI SDK. Comfortable owning the full frontend lifecycle: component architecture, performance optimisation, REST API integration, and CI/CD deployment on Vercel and Railway.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion, React Router

Tools & Platforms: Git, GitHub, Vite, Vercel, Railway, Supabase, Chrome DevTools, Figma

AI & APIs: Anthropic Claude AI SDK, RESTful APIs, YouTube Data API

Low-Code: Framer (advanced animations, CMS, production sites), Webflow

WORK EXPERIENCE

Frontend Developer · **Folde Studio** · 2026 – Present

- Built and shipped the Folde Studio website in 2 days using Next.js and Claude AI, delivering a production-ready experience with clean UI and strong visual hierarchy.
- Building the frontend of an AI-powered HR platform in React shipping onboarding flows, CV management, job recommendation feeds, and employer dashboards integrated with AI-driven backend APIs.

Web Developer Intern · **Azawire Africa (Contract)** · 2025 – 2026

- Built the Azawire Africa website in Framer, implementing pixel-perfect SaaS designs and complex motion interactions to achieve a premium visual standard.
- Collaborated with designers via Figma and shipped features end-to-end from conceptual design to production launch within the Tirra product ecosystem.
- Optimised cross-browser responsiveness and performance, achieving consistent fast load times across all devices.

IT Support Assistant · **Institut Français du Nigéria** · 2023 – 2025

- Managed 50+ Windows workstations, LAN/Wi-Fi networks, and AV systems, maintaining 95%+ uptime across all departments.
- Created internal IT documentation and troubleshooting guides that reduced repeat support tickets and improved response times for staff.

PROJECTS

PitchIQ — Real-Time Sports Dashboard pitchiq.vercel.app · 2026

Next.js 16 · TypeScript · Supabase · Tailwind CSS · Claude AI · Vercel

- Built a real-time sports dashboard aggregating live scores, standings, and match results across football, basketball, tennis, and the 2026 World Cup solo.
- Integrated Claude AI to generate contextual match analysis and commentary, turning raw sports data into readable insight for fans.
- Architected with Next.js 16 App Router and Supabase for real-time data sync; TypeScript throughout for type-safe, maintainable code.

Ojú Ibojú — Yoruba Cinema Streaming Platform ojuiboju.vercel.app · 2025 – Present

React · Node.js · Express · Vite · Tailwind CSS · Claude AI · YouTube API · Vercel · Railway

- Independently designed, built, and deployed a full-stack streaming platform from scratch —handling frontend, backend, and infrastructure solo.

- Engineered a custom video player with pause/play, skip ± 10 s, and a progress bar; built genre rows, a hero banner collage, and a Continue Watching feature using localStorage.
- Integrated the Claude AI SDK to power an in-app Film Creator generating Yoruba movie scripts, synopses, cast suggestions, and poster concepts; secured the API with rate limiting, CORS, and input sanitisation.

Canann Impact Foundation canannimpact.org · 2025 – 2026

Next.js (App Router) · Tailwind CSS · Framer Motion · Lucide React · Vercel

- Built the production website for a Nigerian digital literacy NGO reaching 1,200+ learners across schools and grassroots communities.
- Implemented Framer Motion page animations, a multi-cause donation platform, and impact storytelling pages communicating the foundation's mission to donors and stakeholders.

EDUCATION

B.Eng Computer Science (In View) · Miva Open University · 2025 – Present

Diploma, Software Engineering · University of Ilorin · 2016 – 2018

Frontend Development (Ongoing) · FreeCodeCamp · Scrimba · MDN · 2023 – Present
